## 5. FIRE FIGHTING MEASURES

HAZCHEM code: 2ZE

Specific Hazards: Pressurized container may burst if heated. May give

off toxic fumes if heated to decomposition. Do not breathe fumes. Do not spray on ignition sources. Wear self-contained breathing apparatus. Do not allow runoff from firefighting to enter drains or water courses.

Suitable Extinguishing Media: Appropriate fire extinguishers are dry chemical, CO<sub>2</sub>,

Powder, or Alcohol resistant foam. Use extinguishing media appropriate to the surrounding conditions.

Fire Fighting Advice: Fire fighters should wear full protective gear, including

self-contained breathing apparatus (AS/NZS

1715/1716). Bund area with sand or earth to prevent contamination of drains or waterways. Dispose of fire control water or other extinguishing agent and spillage

safely later.

Hazardous Products of Combustion: No data for the mixture

Permethrin emits toxic fumes of hydrogen chloride

#### 6. ACCIDENTAL RELEASE MEASURES

near spillage. Promptly remove any clothing that

becomes contaminated.

Minor Spills (Up to 20 kg): Very toxic to aquatic life with long-lasting effects.

Aerosol cans are highly unlikely to break. In case of a spill wear protective clothing. Contain spill and collect

using non-combustible absorbent materials.

Major Spills (more than 20 kg): Minimise spread. Contain spill and collect using non-

combustible absorbent material like diatomaceous earth or vermiculite etc. Use only non-sparking equipment for cleaning. Do not allow product or washings to enter the waterways or sewer. If spill does

enter waterway contact local authority.

Eliminate all ignition sources if safe to do so. No smoking, sparks, flames, or other sources of ignition near spillage. Do not allow material to enter confined spaces, due to the risk of explosion or asphyxiation.
